Try these delicious options  now available in all our schools

Here in Appoquinimink, we understand the importance of creating healthy habits. Using careful menu planning and analysis, we provide tasty meal choices designed to meet the diverse cultural, religious and social preferences of our students and staff. Menus emphasize whole grains, fruits, vegetables, and low-fat dairy. We bake, not fry, our foods; restrict sugar and fat; and check carefully to be sure that each meal provides one third the recommended daily allowance of vitamins, minerals, proteins and fats young bodies need to thrive.

Last fall, in response to a growing interest in vegetarian-based options, our school nutrition professionals began testing recipes. After researching dozens of kid-friendly options for their taste, texture, appearance and nutritional value, we are now ready to introduce five delicious vegetarian meals that will be offered on a set basis throughout the week, complementing the healthy entrees already available in our schools. **We feel the meals have universal appeal and hope you'll encourage your student to try them out!**
